

PALGROVE

HUNTER VALLEY SALE

45 CHAROLAIS | 20 ULTRABLACK

7th June 2024, 11am. Scone Saleyards

**BRED TO
DELIVER**

Welcome

We always enjoy the annual trip down the New England to present our draft of bulls to our Hunter Valley clients.

We pride ourselves on providing superior, well researched, high performing genetics back by science and data, that consistently improve performance for commercial beef producers. Our main aim is to drive genetic improvement

in the key profit driving traits in our program, which ultimately delivers higher returns and value for commercial producers.

Stacking the pedigrees of these Palgrove bulls with generations of high performing individuals ensures the accuracy of the commercial outcome is predictable.

Charolais

The Charolais bull demonstrate what we aim to offer to our Hunter Valley clients – medium framed, moderate Birth Weight with strong carcase traits and the ability to finish easily.

For us these bulls are ideal in a cross-breeding situation for commercial Beef production – At times, in modern day breeding, commercial producers lose sight of the hybrid vigour ‘free lunch’ you achieve with cross breeding, both for terminal and maternal traits. At Palgrove we value this highly in our commercial beef production and in the spring of 2023 we have joined 800 plus Angus and Angus cross cows to Charolais bulls. We have verified the ‘proof of profit’ value proposition in numerous feedlot competitions having won the prestigious RNA Paddock to Palate for 6 consecutive years with this cross.

Ultrablack

Our Ultrablack bulls are adding real value to commercial breeders in diverse climatic zones across the country. They have a unique ability to combine strong terminal traits (eg. growth, carcase & yield) with maternal productivity (eg. Fertility, early sexual maturity), meaning the female portion are of high value as replacement breeders and the ‘turn off’ progeny are going to grow, grade and yield. As processors look more at value-based structures, having these animals in your herd will prove valuable.

We look forward to catching up with you all down in the Hunter.

Ben Noller

SALE INFORMATION

About Palgrove

The Palgrove stud is based at Macintyre Station, NSW, with our female herds located at our Ben Lomond Aggregation and Macintyre Station, Inverell, with our ET programs being run out of Palgrove, Dalveen. Our bull depot is located at Drillham, QLD and our new Selling Centre at 'Glen Wilga', Chinchilla, QLD.

For over fifty years, we've adapted our Charolais genetics by committing to research, education, new technologies and a common sense 'cattleman's eye' to suit clients' environmental and management conditions. Palgrove now has the largest registered Charolais herd in Australia.

In 2009, we started developing our Ultrablack bull breeding program. We're positive that they offer another profitable option to our clients' production and target markets. Our bulls are grown out on pasture with moderate sale preparation. We believe a bull's career begins on sale day, so our sale bulls are presented to you ready to work.

AuctionsPlus

AuctionsPlus is an alternate bidding option if you can't attend the sale. However, it is only available to registered users. Please register online at least 24hrs prior to the sale.

Breeding Soundness

All bulls offered for sale have passed a semen test by Veterinarians, at Ced Wise Artificial Breeding Services. The Vet will examine all bulls for structural and breeding soundness to Australian Veterinary Standards and will issue a Soundness Evaluation Certificate.

The Markets

In our comments on most sale lots we've made some suggestions as to the most suitable market options for the progeny by the bulls. Some will fit a broad range.

Several factors influence the outcome of breeding, such as the breed makeup of your cows; seasonal conditions during the growth stage; country and management. In making these market suggestions, we consider a number of factors:

- Pedigree and EBVs
- Maturity type and growth pattern
- Physical attributes, like doing ability

Supplementary Sheet

The bulls have scan data supplied by certified scanning technician, David Reid, for Eye Muscle Area, Rump & Rib Fat, Marbling (IMF%) and will also have sale Weight and Scrotal Size measurements.

Guarantee

All bulls sold by Palgrove are guaranteed breeders. Any claim against the breeding ability of an animal purchased should be made in writing and accompanied by a Veterinary certificate within six months of the date of sale. If a bull fails to breed, it may either be replaced with an animal of comparable value or credit to the full purchase price will be given at any of Palgrove's auction sales or by private treaty.

Health

Palgrove maintains a J-Bas 7 status, so stock are free to move anywhere in Australia (please note WA eligibility).

All sale bulls have been inoculated twice with 7-in-1, Pestigard, Vibrio and 3 Day Sickness, as well as a single dose of 3 germ tick blood.

Delivery

We take personal interest in the efficient delivery of all bulls after sale. The agents oversee all deliveries of sale cattle. We will assist in the delivery of bulls where possible in the Hunter Valley or enroute to our Qld properties via Tamworth.

We've always focused our breeding program on the commercial profit traits, but until now it was difficult to verify the value of Palgrove genetics - particularly for eating quality and the carcase \$ value that Palgrove genetics add.

Over the last few years, we've entered cattle in the Paddock to Palate competition which has enabled us to verify the profitability of Palgrove commercial progeny. Our cattle have risen to the top consistently with winning pens across weight gain, carcase and eating quality. We don't just make claims - we deliver value!

We've had the advantage of watching these bulls grow from birth and know their pedigrees like the back of our hand. As buyers you only get a couple of hours to make an assessment, so we encourage you to use our knowledge to help you select the right bull for your operation.

PERFORMANCE INFORMATION

EBV's

In this sale, there are two separate BREEDPLAN figures presented:

- Charolais Group Breedplan
- Angus MBR Breedplan

We have included the latest Breedplan Data available to us before this catalogue went to print. For more information on accuracies and specific traits not included in this catalogue, visit the Charolais and Angus Society Websites at;

charolais.com.au

angusaustralia.com.au

The Breedplan Data printed in this catalogue has been taken from the March 2024 (Charolais), and April 2024 (Angus) run.

Each breed runs a separate BREEDPLAN evaluation. As the genetic base for each breed is different, only EBVs for animals within a particular breed can be directly compared.

Putting this in practical terms, a 600 day weight EBV of +41 on an Ultrablack bull is not equivalent to a 600 day weight EBV of +41 on a Charolais bull.

Our Ultrablack bull EBV's are provided to us as registered animals on the Angus Multi Breed Register (MBR). Only pure Angus cattle are recored on HBR/APR registers.

This year Angus Australia and Palgrove have been working together to provide tailored benchmarking information on our registered Ultrablack animals. This has involved producing averages and percentile rankings based only on the TACE EBVs of all 2022 born Ultrablack or Brangus animals recorded with Angus Australia. This new benchmarking information is presented in this sale catalogue. We hope this makes it easier for you to make comparisons on these animals.

When assessing cattle performance, it is essential to always compare 'apples' with 'apples'.

Parent Verification Assurance

PV - these lots have been DNA Parent Verified (both Sire & Dam)

SV - these lots have been DNA Sire Verified

DV - these lots have been DNA Dam Verified

DNA verification improves the integrity of the pedigree & EBV information that is displayed in this sale catalogue.

CHAROLAIS REFERENCE SIRES

PALGROVE PLATINUM (P) R/F

- A sire making his mark at Palgrove - producing soft easy doing progeny with impressive constitution, natural balance and sire appeal.
- Sold in 2020 for \$48,000, He has over 150 progeny recorded from our Spring and autumn programs.
- Above average growth and fats with positive Calving Ease traits.

PALGROVE QUIDMAKER (P)

- A bull that is adding the combination of calving ease and strong carcase traits to his progeny.
- A Landmark son with a predictable pedigree, presence, and data set. Sold in 2020 for \$60,000.
- Used heavily in AI and now has a gestation Length in a top 1% of the breed with a 96% Accuracy.
- First 5 Sons to be offered at auction, with feature lots at 1 and 2.

CHAROLAIS REFERENCE SIRES

PALGROVE NITROGEN (P)

- Low Birth Weight bull that was retained and used in our Heifer and Cow Programs.
- Moderate framed, thickset bull with positive Carcass traits and large scrotal size that puts him in the top 25% of the breed.
- Easy doing bull with built in constitution that breeds the Ideal type for our Hunter Valley Sale.

- Palgrove owns the exclusive Australian rights.
- He's proven to be a moderate Birth Weight option that will maintain the stoutness in his progeny. His dam is a consistent producing donor female in the Elders program with a picture-perfect udder.
- A bull that we selected to add strong maternal traits to our herd.
- The First of his Progeny to sell.

First Quidmaker son to sell in the country – One of the thickest set bulls in the draft with top end carcase and yield traits.

Strong pedigree – combining a donor female on the dam's side with the maternal strength of Bluegrass D55 and performance of Evolution.

High positive EMA and yield EBV's confirm his phenotype. He combines this with top of the breed calving ease data and a Domestic \$Index in the top 25%.

Deep bodied; thick butted with a sleek skin and plenty of carcase shape.

Ideal domestic market bull, whose progeny will grow out to heavy weights with ease.

LOT 2

PALGROVE TANK (P) ^{SV}

TATTOO: PK22T2373D

CALVED: 17/09/2022 (20 ½ mths)

Tank really lives up to his name and will stand out in the pen for his muscle expression and hindquarter.

His sire Quidmaker has 13 traits in the top 30 % of the breed, with a unique combination of top of the breed carcase and calving ease traits.

Dam - 6/6 calves, all daughters retained in the herd and a son kept for use in our commercial program.

Top of the breed growth (25%) and Carcase Weight (15%) - One of the highest ranking bulls in the sale for EMA and Yield

Tank is deep bodied and thick topped with a big Scrotal.

PALGROVE TACTICIAN (P/S) ^{SV}

TATTOO: PK22T1811E

CALVED: 02/10/2022 (21 mths)

Tactician - one of the higher performing bulls in the group.

The first of the highly anticipated Houlio sons to be offered in the country. Eight of them in this sale proves his breeding consistency.

Dam - Generations of strong fertility, 7 calves in 7 years, with the grandam retained until 12 years of age with 10/10 calves.

Performance bull with high positive Growth, Carcase and Yield EBV's.

Long, deep bodied with a thick top and extra bone.

Northern or southern production systems he will add dollars to your back pocket.

LOT 4

PALGROVE TEDDY (P) ET ^{PV}

TATTOO: PK22T1238E

CALVED: 06/08/2022 (22 mths)

Platinum is a leading sire of his generation – 26 sons have sold to \$50,000 to average \$20,164.

Dam – 14-year-old donor female whose still in production. Sons have sold to \$55,000 and one will feature in the front end of our September sale.

A touch more frame and performance but handles it with ease.

High positive Growth, Scrotal and Carcase traits – he measured an EMA of 108cm and weighed 600kg at 400 day scanning off pasture.

Note: he is a carrier for BPA (Progressive Ataxia), a recessive condition which shouldn't be of concern to cross breeders – Not recommended in purebred Charolais herds.

PALGROVE TRADEMARK (PP) ^{SV}

TATTOO: PK22T706E

CALVED: 09/07/2022 (23 mths)

Homozygous polled bull who was used as a yearling over heifers in our stud program with semen retained.

Born at 30kg out of a first calf Landmark daughter - The Landmark females are highly valued, his progeny have topped at \$80,000, with 31 averaging \$23,258.

Trademark is long, thick topped with plenty of sire appeal and built in constitution.

EBV's confirm his maternal strength - low Birth Weight, short Gestation with high positive Milk, Scrotal Size and Marbling in the top 15%.

Versatile option - Cows or heifers, Domestic or Export he will add value at all points.

Homozygous Polled.

PALGROVE TOMBOY ^{SV}

TATTOO: PK22T704E

CALVED: 09/07/2022 (23 mths)

A low-birthweight, high marbling Pinball son with extra performance.

Pinball was used over heifers to inject calving ease traits, doing ability and marbling. He scanned 5.7% for IMF at 15 months, off grass.

Dam – first calf heifer by New Look. New Look progeny have topped our Hunter Valley sale at \$44,000.

Tomboy is long, smooth muscled and has a great skin. Uniquely, he combined a 107cm for EMA and 5.1% IMF at 400 day scanning.

High Carcase and Yield sire who would be ideal over British breed females.

PALGROVE TRIBUTE (PP) ^{PV}

TATTOO: PK22T1930E

CALVED: 02/09/2022 (21 mths)

We really appreciate the depth of hind quarter in the Houlio progeny.

Out of a high Marbling dam going back to the ever-consistent Evolution sire.

Tribute is a long, deep ribbed, thick topped with a great skin and bomb proof temperament.

EBV's indicate low Birth Weight with positive Milk and Scrotal Size.

Homozygous Polled.

Note: he is a carrier for BPA (Progressive Ataxia), a recessive condition which shouldn't be of concern to cross breeders - Not recommended in purebred Charolais herds.

PALGROVE TIP TOP (P) R/F ^{PV}

TATTOO: PK22T2442E

CALVED: 20/09/2022 (20 ½ mths)

Pedigree, phenotype and performance! One of the younger bulls in the draft, who ranked highly in his contemporaries at 400-day scanning.

Strong pedigree that includes many breed legends – Oatley, Heritage, Evolution, Kingston and Bluegrass D55.

Dam – 4 calves in 4 years with a 370 DCI.

The highest \$Indexing sire in the catalogue – He shows balance across all the profit driving traits.

We appreciate the performance and combination of carcase and softness in this young sire.

The New Zealand sire Next Direction is adding plenty of performance to his progeny without being extreme.

Dam – 3/3 calves with a 375 DCI. Plenty of maternal strength and milking ability in her pedigree combining Mantra with Hallmark.

He’s long bodied, has plenty of natural thickness and substance with a great skin type.

He combines short gestation with positive growth and top of the breed Scrotal Size and Carcase data. At 400-days he measured 111 for EMA combined with 5.5% for IMF.

Easy doing sire that will add carcase and weight for age without compromising on finishing ability.

An outstanding homozygous polled package – he ticks a lot of boxes.

His sire Quidmaker, has a unique blend of maternal and performance traits – top of the breed for calving ease and carcase .

Dam – 4 calves in 3 years including a set of twins with a DCI of 370. This is her second son to make our Hunter Valley sale.

Great skin – EBV's suggest he will improve carcase and yield in his progeny and would be ideal over British bred females.

A bull we're proud to offer.

Homozygous Polled.

Love this pedigree combination with the performance of Landmark and maternal strength of Red Smoke.

Dam - 7/7 calves plus a set of twins, DCI of 368. She's a full sister to Kingston, who was retained and progeny have sold to \$55,000.

EBV data combines calving ease with positive Growth, Milk, Carcase and Marbling. All profit bases are covered.

Pedigree, data and phenotype suggest he would breed a beautiful line of replacement females.

LOT 14

PALGROVE TRAINEE (P/S) ^{SV}

TATTOO: PK22T2439E

CALVED: 20/09/2022 (20 1/2 mths)

Hiredhand is adding great skin type and extra Scrotal Size to his progeny.

Dam - phenomenal calving record, 9 calves in 9 years with a 369 DCI. Sons have reached \$18,000.

He's long, smooth in his muscle pattern, with the depth of flank to indicate his softness and doing ability.

EBV's confirm his phenotype with high ranking Scrotal Size and Fat Cover combined with positive Fat Cover and Growth.

A versatile sire for any market.

PALGROVE THOR (PP) ^{SV}

TATTOO: PK22T703E

CALVED: 09/07/2022 (23 mths)

Super low birth weight, high \$indexing sire with curve bending EBV data.

His sire Kilo Packer was used in our heifer program, a Trait Leader for low Birth Weight and Weaning Weight, which is rarely seen in combination.

His dam is a highly regarded young donor female that produced some of the best calves in the ET pen this year.

Born at 27kg, weaned at 350kg and had an EMA of 96cm and huge IMF of 6.7% at 400-day scanning off pasture.

Semen retained for our heifer program – **Homozygous polled.**

Another homozygous polled heifer bull option.

His sire Ledger has been used in our heifer program with great success for several years.

Dam - first calving heifer, 2/2 calves, by Kingston.

Moderate framed; deep sided; soft and smooth in his muscle pattern - traits you would expect in a calving ease bull.

EBV's confirm the calving ease - He also sits in the top 5% for IMF% with positive Scrotal Size, Fat Cover and Milk.

Grass or grain, his progeny will grow fast and finish early.

Homozygous Polled.

Tissue Sampling Unit (TSU)

Allflex® Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion. TSUs are easy to use and yield excellent lab results.

TSUs can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and its identification.

ULTRABLACK BULLS LOTS 46-60

We've been breeding Angus bulls since 1989 and since 2009 we have pioneered the development of the Palgrove Ultrablack. These genetics were developed to cater to clients who require black hidred bulls that retain a small percentage of Brahman (approx 20% Brahman Infusion only).

We knew that our clients needed clean sheaths; sleek coats; growth and carcase quality, so we focused our genetic design on these when selecting for both phenotype and objective data.

We have been careful to select predictable Brangus and Angus breeding sires from commercially focused herds with high accuracy Breedplan data.

Our Ultrablack breeding program continues to develop, and we now have a larger percentage of generationally bred Ultrablacks.

Reports from our clients have been overwhelmingly positive - "the heifer progeny mature at an earlier age and fertility percentages have risen markedly".

Also, "the UB steers are weighing heavier earlier than our purebred Angus and we are able to sell them into the same markets, at the same rate"

Performance data:

We see the most sustainable genetic gain being achieved by using practical, commonsense physical selection alongside objective performance data to ensure the best bulls are produced for the next generation.

Our Ultrablack bull EBVs are provided to us as registered animals on the Angus Multi Breed Register (MBR). Only pure Angus cattle are recorded on HBR/APR registers.

This year Angus Australia and Palgrove have been working together to provide tailored benchmarking information on our registered Ultrablack animals. This has involved producing averages and percentile rankings based only on the TACE EBVs of all 2021 born Ultrablack or Brangus animals recorded with Angus Australia. This new benchmarking information is presented in this sale catalogue. We hope this makes it easier for you to make comparisons on these animals.

Important to note that if you search these animals on the Angus Australia data base, the percentile ranking displayed will be of the entire HBR/MBR/APR.

Note: If required, any of our bulls can be registered on the Brangus Society's Ultrablack Register.

ULTRABLACK REFERENCE SIRES

PALGROVE QUICKSILVER ET

- One of the lead bulls in our 2021 Annual Sale, sold for \$24,000- He was used as a yearling with semen retained.
- His sire Business Line was an impact sire of his generation – 157 progeny recorded in our herd with 31 selling at auction to average \$19,931 and grossing \$578,000.
- He's adding so much volume, substance and fleshing to his progeny.

CB MASTERPIECE

- A multi-trait leader in the USA who has been used predominantly over heifers.
- These are his first sons to sell at auction – He combines phenomenal weight for age and carcass traits and IMF in his progeny with moderate birth weights.
- Sons in the USA have reached \$72,000 and he has been extensively through the USA.

Angus MBR Registered: AA 81% | Br 19%

An upstanding second generation Ultrablack to kick off our 2024 Hunter Valley sale.

Dam – 4/4 calves with a 356 DCI. A true test of a functional, efficient, and profitable female is her weaning weight ratio – she has weaned a phenomenal 58% and 62% of her body weight on the past two calves.

He’s deep ribbed; long bodied; with so much volume and capacity – combined with a sleek skin and fleshing ability.

High ranking EMA EBV combined with a low Birth Weight, yet he weighed in the top 10% of his cohort at 400-day scanning.

Homozygous Polled, Homozygous Black.

TATTOO: QHB22T868 **CALVED:** 20/07/2022 (22 1/2 mths)

Angus MBR Registered: AA 82% | Br 18%

The only Quick Release son catalogued – He's a consistent breeding sire that has been utilised in both our heifer and cow programs.

Dam – 5/5 calves with a DCI of 367. The Glenroy female line has produced a number of sale toppers in the last 4 years.

Leans a touch more towards the Bos Indicus in phenotype with a 'seal-like' skin and plenty of length.

EBV's indicate low Birth Weight with positive Fat Cover and IMF.

A sire that will breed a beautiful line of replacement females.

Homozygous Polled, Homozygous Black.

TATTOO: QHB22T967 **CALVED:** 26/07/2022 (22 1/2 mths)

Angus MBR Registered: AA 79% | Br 21%

His sire Quantum was the high selling bull in 2021 at \$35,000 – we used him as a yearling and retained semen for his carcase traits – Had an EMA of 150cm when he sold as a two-year-old.

He's long bodied; big volumed; high yielding with great constitution.

A carcase infused data set with high positive EMA and Yield EBV's.

He's an all rounder in terms of markets – plus he should breed you some great replacement heifers.

Homozygous Polled, Homozygous Black.

TATTOO: QHB22T1389

CALVED: 14/08/2022 (22 mths)

Angus MBR Registered: AA 81% | Br 19%

Replay, by CRC Guardian, transmits a great skin and extra length into his progeny.

Dam – 3/3 calves with a 367 DCI.

A real meat machine – Plenty of length; ideal sheath design and thick butted.

His data backs his phenotype with high ranking EMA and IMF with positive Growth.

He really demonstrates our balanced breeding objectives, of combining finishing ability; strong carcase traits; maternal strength and performance.

Homozygous Polled, Homozygous Black.

CALVED: 21/08/2022 (21 1/2 mths)

Angus MBR Registered: AA 93% | Br 7%

Higher Angus content bull, whose progeny will fit the premium specs.

Dam – 5/5 calves with a DCI of 370. The Glenroy female line is renowned for fertility.

Moderate boned bull, he's deep and long with the ideal sheath design we aim for in these Hunter Valley bulls.

Impressive scan data at 400-days, cracking 600 kgs with an IMF of 6.8%. He's the second highest fat cover bull in the catalogue.

Homozygous Polled, Homozygous Black.

He's smooth in his muscle pattern, yet thick as a brick when you get behind him.

Dam - 3/3 calves with a DCI of 363. The Kingower females are functional with great udder structure.

Leaning a touch more toward the Angus in phenotype he has a great skin, doing ability and temperament. A hard bull to fault.

One of the lowest birth weight EBV's in the catalogue combined with positive Carcase traits and IMF in the top 25%.

Will add performance to his steer progeny but also has the maternal strength to breed a great line of replacement females.

Homozygous Polled, Homozygous Black.

SALE NOTES

Thank you for attending our 2024 Hunter Valley Bull Sale. We wish you all a safe trip home!

In 2023 we won the prestigious RNA Paddock to Palate Competition Class 37, 100 Day HGP export, for the **SIXTH** year in a row!

The bred in predictability of our genetics was highlighted by placing 1st, 3rd and 4th from three entries.

Our winning pen had an average carcase weight of 374.36 kilograms, with an average dressing percentage of 55.59 per cent, and average P8 and rib fat measurements of 14 and 8mm respectively.

It's the commercial relevance of that competition which draws us to it each year, it's a nice way to prove to our clients that we are producing genetics which will get that extra value at the other end of the supply chain. We use the feedback we receive to continually improve our genetics, to make sure we're producing the best cattle to offer to our clients.

From Paddock to Palate our Genetics are '*Bred to Deliver*'

CLASS 37 (100 DAY)

- OVERALL - 1st, 3rd & 4th (from 3 entries)
- CHAMPION INDIVIDUAL CARCASE
- RESERVE CHAMPION INDIVIDUAL CARCASE
- Pen of 6 Carcass - 2nd and 3rd
- Highest Weight Gain (Pen) - 2nd (ADG 2.895kg) and 3rd (ADG 2.85kg).

CLASS 40 - (HGP FREE 100 DAY)
