

palgrove charolais

ANNUAL BULL SALE

FRIDAY 11TH SEPTEMBER 2026, 12 PM

Lot 3 Homo Polled

ON PROPERTY - "GLEN WILGA" CHINCHILLA

Welcome to our 2026 Annual Bull Sale

On behalf of our families, we'd like to sincerely thank you for your interest in Palgrove Charolais and for taking the time to inspect this year's sale offering.

This year represents another exciting chapter for our business. Following the purchase of the entire Palgrove Charolais stud in 2025, we are incredibly proud to continue the legacy established by the Bondfield family. More than 50 years of disciplined breeding have created one of Australia's most respected Charolais herds, and it is a responsibility we do not take lightly.

Our goal is simple—to preserve everything that has made Palgrove Charolais successful while continuing to build a breeding program focused on the future.

Every breeding decision we make is centred around producing practical, profitable cattle for commercial beef producers. We believe great cattle are built on balanced genetics, structural integrity, fertility, temperament, performance and longevity—not the pursuit of any single trait.

The consistency of the Palgrove Charolais herd is the result of decades of disciplined selection and the depth of pedigree behind every animal we offer. By combining these proven cow families with elite genetics from around the world, we continue to build cattle capable of performing in a wide range of commercial environments.

We believe this year's sale team is one of our strongest to date. They are backed by proven sire lines, powerful maternal families and objective performance data, but more importantly, they represent the type of cattle we are proud to use ourselves.

As always, our commitment extends well beyond sale day. Whether you purchase one bull or a large draft, we appreciate your support and remain committed to helping your breeding program succeed.

Thank you to our loyal clients who continue to put their trust in our genetics, and welcome to those joining us for the first time. We look forward to catching up with you on sale day and discussing how Palgrove Charolais can help achieve your breeding objectives.

We wish you every success with your selections.

Kind regards,

Ben & Gemma Noller

OUTSIDE AGENT REBATE:

The vendors agree to a 3% rebate to outside agents who attend the sale with, or buy on behalf of, their clients and settle within 7 days. 1% rebate to outside agents introducing approved buyers to the vendor prior to the sale and settling on their behalf within 7 days of the sale. (This clause will be strictly enforced by the vendor).

palgrovecharolais.com.au

Inspection & Bidding

Cattle are available for inspection prior to the sale by arrangement. If you cannot attend sale day, bidding is available via phone or AuctionsPlus. We encourage you to discuss your bull requirements with our team—we are always happy to assist with your selection. AuctionsPlus users should register at www.auctionsplus.com.au at least 24 hours prior to the sale.

Sale Day Safety

While we pride ourselves on the temperament of our bulls, cattle can behave unpredictably on sale day. Please follow staff instructions when entering sale pens. Those with limited mobility or accompanying children or prams should not enter the pens.

Guarantee & Health

All stock are guaranteed breeders. Claims regarding breeding ability must be made in writing and accompanied by a Veterinary Certificate within six months of sale. Palgrove Charolais maintains J-BAS 7 status. Sale bulls have been vaccinated with 7-in-1, Pestigard, Vibrio and 3 Day Sickness and have received a single dose of 3 germ tick blood unless otherwise stated.

The Sale Bulls

A bull's career begins, rather than ends, on sale day. Our bulls are developed on a moderate, long-term ration and when the season permits coasting bulls into sale on oats with a focus on soundness, longevity and working performance. We encourage comparison within contemporary groups rather than relying solely on weights or scan data between sales.

Delivery & Freight

George & Fuhrmann and Nutrien will coordinate delivery of sale cattle. Freight assistance is available to selected major centres including Emerald, Roma, Inverell and Glen Innes. Please contact Ben Noller on 0427 700 949 prior to the sale.

Please refer to Terms and Conditions of Sale included in Catalogue mailout or displayed sale day.

Society & EBVs:

All animals in the Sale are registered with the Australian Charolais Society.

If looking up animals in the Society our Herd Prefix is PK.
eg PK22T1169E

In this catalogue BREEDPLAN figures presented are from the **JUNE** Charolais Group Breedplan Evaluation.

Charolais Group Breedplan Averages 2024 born calves

	BW	Milk	200	400	600	SS	EMA	Rump	IMF%	RBV	Dom\$	N'th\$
EBV	0.2	6	12	24	32	1.1	1.8	0.5	0.1	0.1	23	38

Parent Verification Assurance:

PV - these lots have been DNA Parent Verified (both Sire & Dam)

SV - these lots have been DNA Sire Verified

DNA verification improves the integrity of the pedigree & EBV information that is displayed in this sale catalogue.

Charolais Genetic Disorders:

Similar to other breeds of cattle, Charolais too have known genetic conditions. The two in which we test for in Australia are;

1) Myophosphorylase Deficiency (MYO), if affected, prevents an animals ability to mobilise glucose and results in loss of muscle function & exercise intolerance; and

2) Progressive Ataxia (BPA), a neurodegenerative disease of the central nervous system which if affected, results in an animals inability to stand.

An animal can be an unaffected carrier and live a normal life, but if bred to another carrier can produce affected offspring. Our sale bulls are tested for these disorders and any carriers are identified on the Charolais Australia website as well as included within the individual lot information. As they are recessive conditions, they shouldn't be of concern to our cross breeders, however we wouldn't recommend to our purebred Charolais clients.

BUILT ON PEDIGREE - PROVEN BY RESULTS

For more than 50 years, Palgrove Charolais has focused on breeding cattle that deliver measurable commercial returns.

Our breeding philosophy has never been about chasing one exceptional individual or breeding cattle specifically for competition. Instead, we've concentrated on building depth throughout our pedigrees—selecting balanced, functional cattle that perform consistently across large contemporary groups.

One of the best measures of commercial performance is the RNA Paddock to Palate Competition.

Recognised as Australia's premier commercial beef performance trial, it independently benchmarks cattle throughout the entire beef supply chain—measuring feedlot performance, growth, carcase value and eating quality. It measures the traits that directly impact profitability.

For us, Paddock to Palate isn't just another competition. It is independent validation that our breeding program is producing cattle that perform where it matters most—in commercial production systems. They reflect the depth and consistency of the Palgrove Charolais breeding program.

Every generation is selected using the same principles:

- Balanced, commercially relevant genetics.
- Strong maternal cow lines developed over 5 decades.
- Structural soundness, fertility and longevity.
- Growth and carcase performance without sacrificing functionality.

The result is a herd capable of producing cattle that perform consistently across large contemporary groups, not just exceptional individuals.

2026 RNA Paddock to Palate - Weight Gain

SIRES OF INFLUENCE

PALGROVE RED ROCK (P) R/F

We rate Red Rock as one of the best bulls we've bred, and with more than 300 progeny on the ground, he has certainly lived up to that reputation.

Now six years of age, he remains 'sound as a bell' and continues to be walked and heavily used in our AI program. Moderate framed, thick topped and deep quartered, with excellent feet, balance and doing ability, he is everything we strive to breed in a modern Charolais sire.

He's down the middle of the graph for his performance data and is backed by outstanding structural integrity, consistency and pedigree strength. His sons have topped at \$40,000 twice and returned just under \$640,000 in sales for his first year. His feature son is Lot 3, who reminds us of Red Rock at the same age, with the added advantage of being Homo polled.

PALGROVE ROCKERFELLA (PP)

A paternal brother to Red Rock in a homozygous polled package, Rockerfella shares the softness and doing ability inherited from Next Gen. We retained Red Rock in the 'R' year, while Rockerfella sold for \$100,000.

A Trait Leader, he ranks in the top 3% for both Weaning Weight and Fat Cover. Limited semen remains for ET use, but his influence will continue through his sons in our herd.

His first 18 sale sons topped at \$40,000 and averaged \$21,000. We believe this year's draft is even stronger, with five outstanding yearlings leading off this section at Lot 43, 44, 45, 46 & 47.

SIRES OF INFLUENCE

PALGROVE STALLONE (P)

A first-release sire that we rate very highly, so much so that we have retained a son this year—Palgrove Vegas V2259E (P).

We admire Stallone's skin type, muscle pattern and balanced performance data. A Trait Leader for all growth traits, he ranks in the top 5% for both \$Indexes and the top 1% for 200-Day Weight, Carcase Weight and Eye Muscle Area (EMA), while maintaining moderate calving ease.

We believe this sire line will play a major role in our breeding program for years to come.

Feature Lots: 17, 18, 25, 49.

SILVERSTREAM SPECTRA (PP) R/F

First-release sons from Spectra, the \$65,000 record-priced Charolais bull.

When we inspected Spectra in New Zealand, we saw a homozygous polled sire with the extra frame, bone and power that are difficult to find in a PP package. We selected him to add lift and substance over our more moderate-framed females, while his soft, supple skin has become a standout feature of his progeny.

Represented by nine sons this year, many were used as yearlings in the stud herd. They have a strong northern focus, offering the growth and capacity to target heavier market specifications.

LOT 1

PALGROVE VICTORIOUS (PP) ^{PV}

D: PALGROVE PANACHE M778E (P)

S: PALGROVE MASTERPIECE (P)

D: PALGROVE APPEAL P1136E (PP)

D: PALGROVE APPEAL L262E (P)

Kicking off this year's draft is a standout homozygous polled bull that was used within the stud herd as a yearling.

His dam has produced 6 calves in 6 years with an impressive Daily Calving Interval (DCI) of 358 days.

He displays exceptional length, natural thickness, softness, and balance, underpinned by sound structure and correctness. Performance data further reinforces his quality, with positive growth and fat cover figures complemented by strong positive carcass traits.

A powerful, well-rounded sire prospect with the genetics and phenotype to add value across a range of breeding programs.

Homozygous Polled.

D: SILVERSTREAM OCELOT I100 (P)

S: PALGROVE NECESSITY (PP)

D: PALGROVE ALICE Q1632 (PP)

D: PALGROVE ALICE L1176C (P)

Similar to the previous offering, this bull was successfully used in a multiple-joining program as a yearling over stud females.

His dam has produced 5 calves in 5 years and records a DCI of 366. She is by Necessity, a high-selling bull of his year and a son of the top-selling sire Kudus.

Viewpoint's EBVs highlight strong positive growth and Carcase Weight (CWT), supported by a Domestic Index ranking in the top 15% of the breed.

A bull with excellent skin, a strong muscle pattern, natural thickness, and a large scrotal circumference. He offers added muscle shape and performance and is suitable for use across northern and southern production systems over both British and Bos indicus based females.

Homozygous Polled.

D: PALGROVE PANACHE J869 (P)

Red Rock has proven himself as one of the leading sires of his generation. This is an opportunity to secure one of the best sons we have offered to date.

He reminds us of Red Rock at the same age, with the added advantage of being Homozygous Polled.

His performance data indicates rapid early growth, moderating to a desirable mature cow weight, while maintaining positive Carcase Weight and fat EBVs.

An impressive bull with exceptional thickness, strength through the spine, and outstanding hip shape, all combined with impeccable structure.

Velocity was successfully used as a yearling and has impressed us enough that we intend to retain semen and use him extensively within our stud program this spring.

Semen Retained. **Homozygous Polled.**

D: PALGROVE DAPHNE H122A (P) TW

A super sleek skin on this first Spectra son to be offered at auction. Single-sired as a yearling, with semen retained. Spectra held the New Zealand Charolais record top price of \$65,000 and continues to add performance, growth, bone and silky skin to his progeny.

We admire this bull's moderation and doing ability, underpinned by the influence of Mantra and Bluegrass D55 on the maternal side. The strength of these cow families blends perfectly with the powerful performance package that Spectra consistently delivers.

Strong performance data backs up his phenotype, with short gestation, all growth traits ranking in the top 5%, scrotal size in the top 1%, and positive figures for carcase weight, fat cover and IMF.

D: PALGROVE FELICITY H671E

Rockerfella has established himself as one of the leading sires of his generation. Last year, his 14 sons sold to a top of \$40,000 and averaged \$21,142. He is again well represented in this year's draft with 17 sons on offer.

Lots 5 and 6 are paternal brothers that were used in a multiple join as yearlings. Similar in both phenotype and pedigree, they are by Rockerfella and trace back to the proven Felicity H671E grandam.

Vantage will add bone, frame, carcase shape and softness, with Fat Cover ranking in the top 25%.

Stud or commercial, every breeding program can benefit from a Rockerfella son.

D: PALGROVE CLARA D211E (P)

A medium framed Rockerfella son that offers calving ease, fat cover and fast early growth in a moderate framed package.

His pedigree includes the famous Clara D211 donor female on the bottom side with the calving ease, fat cover and marbling traits injected from the LT Authority sire who is a Trait Leader for low birth weight and Scrotal Size.

EBV's confirm calving ease, ranking in the top 1% for calving ease daughters, with a unique combination of Fat Cover (top 1%), IMF% (top 5%) and EMA in the top 10%.

North or south, this is a bull that would work well for programs looking to add early maturity and fat cover without compromising on carcase traits

Homozygous Polled.

We love seeing bulls with this level of performance and extra bone that carry it all with ease. It's hard to find this combination in a homozygous polled package.

His donor dam also has sons selling at Lots 24 and 53. She is a larger framed, high-performance female with Growth, EMA and Carcase Weight all ranking in the top 1% of the breed.

Very Neat's figures match the phenotype, with all growth traits in the top 6%, complemented by positive Carcase, Fat Cover and IMF, while both \$Indexes rank in the top 30% of the breed.

An ideal option over Bos indicus based cows in northern production systems.

A genuine carcase improver, recording the largest EMA in the entire drop at 400-day scanning last November—an outstanding 125 cm² at just 15 months of age on pasture.

His dam has an exceptional production record, calving five calves in five years with a 374-day DCI.

He has plenty of sire appeal, combining strength of head, an exceptionally sleek skin, extra length and outstanding carcase shape.

His profit potential is backed by the figures, ranking in the top 20% for both \$Indexes, the top 4% for Scrotal Size and the top 4% for 200-Day Weight.

You'll begin to see the pattern in these Spectra sons—extra length, outstanding weight for age, big scrotals and an exceptionally sleek skin. Spectra is a Trait Leader for Scrotal Size and all Growth traits.

Voodoo's dam is by the renowned cow maker Heritage (sire of Landmark). A deep-sided female with a perfect udder, she ranks in the top 2% of the breed for Milk and has produced seven natural calves in seven years, while also being successfully flushed during that time.

Ranking in the top 1% of the breed for Scrotal Size, he is the type of bull to add extra length, frame and weight for age throughout a calf crop.

Very Smooth is a prime example of what we love about the Stallone progeny – Sleek skins, impeccable structure with extra muscle shape and backed by strong performance data.

Dam – 5 calves in 5 years with a 368 DCI. Her son in last years sale by Red Rock sold for \$40,000.

Hard to fault data set – both \$Indexes are in the top 10%, he bends the curve with positive calving ease and weaning weight in the top 5%, combined with Carcase weight and EMA also in the top 5%.

We think this bull has a lot to offer for both stud and commercial producers.

D: PALGROVE REFINE M325E

Third Stallone son in a row - You will start to see the pattern of extra carcase shape and growth with a big scrotal and super sleek skin, that's why we love them.

His pedigree combines many breed legends - Howzat, Masterpiece, Jerrico, Evolution combined with the Refine female line.

Solid EBV data without pushing any extremes, to us that is where the most profitable bulls sit. He's got moderate calving ease data with positive growth, carcase and Fat Cover combined with a Scrotal Size EBV in the top 15%.

Top end commercial bull.

You could buy this young sire on pedigree alone. He combines Rockerfella on the top side with an outstanding maternal pedigree featuring Charm, Viagra, MAC 2244 and the cornerstone Bronwyn donor female Y275E.

The first 14 Rockerfella progeny to sell at auction topped at \$40,000 and averaged \$21,143. We love his ability to add fleshing and softness without compromising carcase shape or volume.

An easy bull to recommend — every herd should have a Rockerfella son in it.

A northern specialist, adding extra head, bone and frame for those chasing more grunt over Bos indicus-based females.

His EBVs back up his performance with strong positive growth, positive Scrotal Size and Fat Cover, while ranking in the top 40% for the Northern Maternal Index.

He displays the fleshing, strength of head, depth of flank and thickness we have come to expect from the Rockerfella progeny. A real all-round package for producing heavier-weight progeny in both grass and grain finishing systems.

Impressive pedigree and out of a leading donor female that also has two sons selling at lot 13 and 24 in this sale.

It's always rewarding when the data confirms what the pedigree suggests. Workhorse has emerged as one of the standouts in his contemporary group for both EMA and IMF. His pedigree is stacked with carcase power, featuring three sires ranked in the top 1% of the breed for EMA and two in the top 1% for IMF—including Hannibal, Legend and Hallmark.

Performance data indicates high positive growth and carcase traits – He has the type and pedigree to suggest he will add doing ability and softness to your herd.

By Tornado who was used as a yearling for his balance of calving ease and elite growth. He ranks in the top 10% for the Domestic Terminal Index and is represented by four sons in this sale (Lots 14, 27, 28 and this lot).

His dam sold for \$15,000 as Lot 9 in our March, Make Your Mark Female Sale, admired for her functionality and neat udder.

We love offering these thick-set, soft-doing bulls to our commercial clients. They represent the modern Charolais type that has helped Palgrove Charolais genetics feature prominently in the RNA Paddock to Palate winners' circle over the past nine years.

Victory is by Supersonic, the retained Platinum son selected for his balance of calving ease, growth and top 10% EMA, Carcase Weight and Fat Cover.

These Supersonic sons are all stamped with the same soft supple skin with that extra fleshing and softness to suggest their progeny will finish easily.

His pedigree blends together some of our best maternal and performance genetics featuring Platinum, Hallmark, Carbine and Zenith.

Thankyou for your support.
We look forward to sharing a drink together after the sale.
